

# **How safe are your veggies project**

**June, 2017**

## **Brinjal**

Fifty brinjal samples were collected randomly in the month of June, 2017 from the markets in the areas of Mehidipatnam, Shamshabad and Gudimalkapur.

The samples were analyzed by using validated method with confirmatory analysis on GC-MSMS at 10 PPB (Parts per Billion) level.

Out of 50 samples analyzed, no samples were found contaminated with pesticide residue.
