

Massive Open Online Course in Rodents and Household Pest Management

Batch - 03 (April to June 2021)

About the course:

The changing public health scenario of the country calls for organized commercial pest control operations. This, in turn, will give rise to demand for technically qualified manpower to manage different aspects of identifying the insect pests that are problematic in urban and sub-urban areas and novel management techniques, etc. Realizing the importance of trained manpower in the sector, NIPHM is launched a 3 months MOOCs in Rodents and Household Pest Management.

Objective of the course

The objective of the course is to create a pool of pest control professionals with capacity to manage pest control operations efficiently and to help them to have latest knowledge and understanding of biology, identification, habitats and management of rodents and household insect pests.

Salient features of the course

1. An online course to be offered in an user-friendly manner under MOOCs platform
2. Comprehensive coverage to cater to the sectoral needs
