National Webinar on Recent Trends in Vertebrate Pest Management

About Webinar:

Several vertebrate pest species currently cause economically significant damage to various crops in our country. These include wild boar, monkey, blue bull, birds and rodent. Damage due to vertebrate pest's farmers bears the severe loss during harvesting season and post-harvest. In India, vertebrates have been estimated to cause 5 to 20% losses in various crops. Severity varies with season, location and ecosystem. In addition to the rodents and birds the higher vertebrates such as Monkey, Nilgai, Wild boar are also becoming a serious pest and attack wide variety of crops in our country resulting into enormous crop damage. To address the issues, NIPHM is organizing a one day webinar on Recent trends in vertebrate pest management.
